

59604 EDGE GUIDE RETROFIT KIT

Retrofit Kits

OVERVIEW

Matrix is committed to providing our customers with superior vertical form fill seal packaging solutions and to fully meeting your needs. To meet these objectives we provide one of the most complete customer service programs available in the industry including the service personnel, parts and training necessary to keep your equipment running at peak efficiency.

Our experienced, dedicated employees will assist you with ordering, technical support, service or training needs to help ensure that your packaging solutions operate as effectively and efficiently as possible.

Matrix recommends you hire a factory trained technician to install this retrofit kit.

KIT CONTAINS:

- Edge guide actuator cylinder
- Universal actuator mounting kit
- Dual reservoir assembly and mounting bracket
- Illustrated parts drawing with part number
- Filling instructions

59604 EDGE GUIDE RETROFIT KIT

Retrofit Kits

WHY REPLACE MY GUIDE ACTUATOR CYLINDER?

- **SAFETY:** The speed control will now be located outside of the frame for safer, faster adjustment of unwind movement if required
- If the edge guide actuator cylinder were ever to leak, recharging the system is easy and in the open. Just pull the caps and refill ½ way with gravity – no recharge kit or oil filled tray required! Keep the machine in production
- It may pay to be proactive and replace it now while you are in control of the schedule before a tracking and recharge event forces down time

Kit 59604 Replaces 42252

Assembly, edge guide actuator Mindman 42252 is on the following machines.

- **Orion**
- **Ares**
- **Mercury**
- **Elete**
- **Proteus Bag makers**

If your bag makers bill of materials list 42252 as your Edge Guide Actuator then this kit will work for you.
