

IQF & FROZEN FOODS

WHAT OUR PARTNERS ARE SAYING...

Tony Polacek *Engineering Consultant, Sharp Engineering*

“I purchased seven Matrix machines in the ten years I was at Golden County Foods (now Monogram Foods). It’s with Matrix’s help that we became a successful frozen appetizer producer. The systems were great, exceeded our expectations, and were very reliable. I have purchase and used many brands of VFFS machines in the past 30+ years but none compare to Matrix for ease of maintenance and operation.”

Brandon Schmidt *Plant Manager, Harvest Food Group*

“We were concerned about keeping costs down with our first VFFS purchase and invested in a competitive machine to Matrix. The initial “savings” quickly disappeared as lost production continued to mount. We never did get that machine to run satisfactorily. When we searched for a new bagger supplier, Matrix was at the top of the list. The Matrix bagger delivered performed exactly as promised, and we couldn’t be happier with our decision. Our only regret was not buying Matrix in the first place.”

Pero Family Farms, *Fresh Foods Division*

“We’ve been using Matrix systems and machines since 2009 and we based our initial purchase on their outstanding reputation. Matrix didn’t disappoint. We find their systems to be reliable, efficient, and cost effective. Any time we’ve needed service they have been extremely reliable and responsive. We currently have (6) of their machines in operation and hope for more in the near future. We now look to Matrix as an integral part of our business.”

LEADING FLEXIBLE PACKAGING MACHINES

Morpheus

Vertical Form/Fill/Seal

- Capable of running films that require longer seal times while still yielding high throughput
- AutoPro™ Automatic Setup & Changeover System
- Reduce downtime by a minimum of 50% when a new package is run
- Replicates those same adjustments at any time in the future

Triton

Vertical Form/Fill/Seal

Available with an open channel frame (Fully washdown & hygenic design) and poly jaw.

FL 1.4 - 4.2

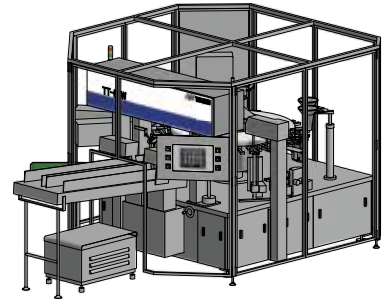

Horizontal Form/Fill/Seal

- All FLtechnics HFFS systems can be upgraded to a wash-down platform.
- Simplex up to a Quadruple index.
- Allows for a variety of fillers for different applications / solid to liquid fill in a single pouch.
- Auto splice system requires no manual lifting.

TT-8DW-N / IP65

Pre-Made Poucher

- Wash-down capability, able to handle a large range of pre-made bag sizes - extremely versatile for Co-Packers
- Up to two fill stations / possible duplex index or single index with double fill stations for IQF and sauce application

BAG STYLE FLEXIBILITY

Our solutions are designed to grow with your company and respond to market demands for new products and packaging requirements.

Our customers are able to utilize their Matrix machines over their entire product line, from standard pillow bags to new doyp style bags, while providing the flexibility to offer flat bottom bags should your customer request that bag style in the future.
